

Simplify Air Conditioning connectivity with any Home Automation

Your all-in-one solution to connect Split, Multi-Split and Mini-Split HVAC units from well known brands, such as:

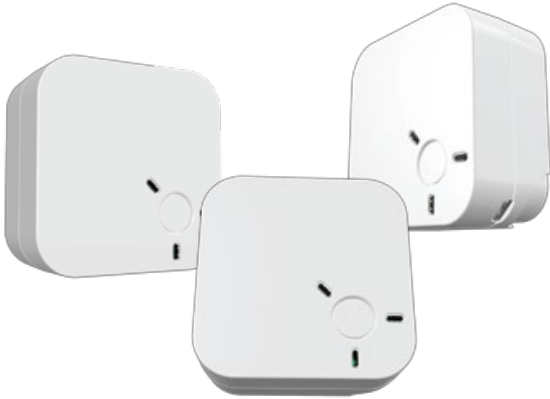

Daikin, Mitsubishi, Fujitsu, Toshiba, Panasonic, Sanyo, and Hitachi.

With a full bi-directional connectivity, it allows having real-time feedback and full control over the HVAC system.

With CoolLinkHub versatile connectivity options: Ethernet (TCP-IP), RS232, Modbus and KNX you will be able to easily connect to any Home Automation system and to our CoolRemote cloud solution.

New
CoolPlug

CoolLinkHub

-  Seamless integration of HVAC units with any Home Automation.
-  Major HVAC brands support e.g. Daikin, Hitachi, LG, Mitsubishi Electric, Panasonic/Sanyo, Toshiba, Fujitsu.
-  Full Bi-Directional control and realtime feedback.
-  Easy (plug & play) installation on the indoor unit.
-  Cost effective solution

-  Easy integration via Ethernet (ASCII TCP IP & MODBUS IP), RS232 (ASCII), RS485 (MODBUS RTU), KNX for all HVAC brands.
-  Unified HVAC Integration protocol compatible with all existing Home Automation drivers for CoolLinkNet and CoolMasterNet.
-  Simultaneous multi-HVAC brand integration.

CoolRemote.net — remote control and monitoring over the internet, via Smartphone, Tablet and PC.
